

# MUHAMMAD HUNAIN HUSSAIN

## Backend Developer · CTO at Alpha Orbit

Karachi, Pakistan | +92 325 0801826 | hunainakramhussain12345@gmail.com | linkedin.com/in/hunain-hussain | github.com/hunain339 | hunain-portfolio.lovable.app

### PROFILE

Self-taught backend developer and CTO at Alpha Orbit, where I own backend architecture, data pipelines, security, and system design for a production startup. 7+ months of hands-on Django/DRF development, including Tweetbar, a full-featured Twitter-clone REST API covering auth, caching, query optimization, and full-text search. Currently pursuing a BSAI at Iqra University, with a long-term focus on AI and automation engineering.

### EXPERIENCE

#### Chief Technology Officer — Alpha Orbit

2025 — Present

- Own backend architecture, database design, data pipelines, and security across the product.
- Lead system design decisions for a small founding team, translating product requirements into production infrastructure.
- Set technical direction and engineering standards as the company's sole backend/infrastructure owner.

### PROJECTS

#### Tweetbar — Twitter Clone REST API — Django · DRF · PostgreSQL · Supabase · Vercel

2024 — Present

- Built from scratch: JWT auth, tweet CRUD, comments, likes, notifications, view counters.
- Eliminated N+1 queries with select\_related / prefetch\_related — measured and documented performance gains.
- Integrated view-level and low-level caching, rate limiting, and full-text search.
- Deployed live on Vercel with Supabase (PostgreSQL + storage); includes admin dashboard.

#### Job Board Platform — Django · DRF · AWS EC2 · CI/CD

2025

- Deployed a full job board application to AWS EC2 with a working CI/CD pipeline.
- Handled infrastructure, deployment, and domain configuration end-to-end.

#### DRF Reference Guide — Python · ReportLab · 12+ pages

2025

- Authored a structured, multi-page technical reference covering DRF fundamentals through Docker and MySQL.
- Used as a personal interview-prep and study tool — doubles as a documentation-writing sample.

### EDUCATION

#### BS Artificial Intelligence (BSAI) — Iqra University, Gulshan Campus

In Progress

#### Intermediate (ICS — Computer Science) — Bahria College DHA

2024 — 2026

### TECHNICAL SKILLS

**Languages:** Python, SQL, Bash

**Frameworks:** Django, Django REST Framework, FastAPI (learning)

**Databases:** PostgreSQL, MySQL, SQLite

**Platforms & Tools:** AWS EC2, Vercel, Supabase, Docker, Redis, Celery, Git, GitHub, Ubuntu/Linux CLI, Postman

**Concepts:** REST API design, JWT auth, caching, rate limiting, N+1 query optimization, full-text search, CI/CD

### HIGHLIGHTS

- Built and deployed a production REST API with 10+ endpoints — self-taught in under 8 months.
- Documented query optimization with real, measured N+1 reduction metrics — engineering rigor, not just code.
- Runs a structured self-curriculum: daily learning logs, performance optimization, system-level thinking.
- Currently expanding into Linux systems and FastAPI toward an AI/automation engineering trajectory.

### LANGUAGES

Urdu — Native | English — Professional
